

Green Waste, Construction or Demolition Material, Waste Tires

Green waste – is what comes out of your yard – grass clippings, leaves, tree trunks and branches.

Construction or Demolition Material – includes debris removed from a remodeling project, roofing material, concrete, asphalt, or lumber.

Waste Tires – from your vehicles (cars, trucks, tractors, etc.) or off the tree in the backyard.

The following sites handle some of these types of material. Please call before taking any waste material to their sites to confirm which materials they accept and their current charges.
