The above chart has been developed to help residents determine which days of the week are watering days for their address. For example, if your street address number ends in a 2, 4, 6, 8, or 0 it is considered an even number. Even number addresses are scheduled to water on Tuesday, Thursday, Saturday, and Sunday. Odd number addresses (1, 3, 5, 7, & 9) water on Monday, Wednesday, Friday, and Sunday.

Residents who follow the above watering schedule are conserving water. Watering on your scheduled water days and during the morning or evening hours will help conserve water for everyone.
